Mitch

The RFP went out to the contractor and we are expecting the proposal COB today. Hope to review and negotiate the contract this week. Next week will be follow-up review by Office of Council and Contracting. Hope to award by the 11th of Aug.

From there we will have the contractor put together some radiation work permits for entry and exit into these specific areas.

Please let me know if you need anything else.

Hans

RE: Safety Light - record storage
areas

Mitch

Apologize for the delay in responding to your email. I was on annual leave for a week and then had a 3 day training class. In short, the SOW will include a task for the contractor to review and gather (electronically) the SLC records. During our site visit, we identified a large amount of documents at the site within two secure/contamination control areas. I would like our contractor to discuss with you and your team the needs of any potential information discovered at SLC. This will hopefully minimize the

ORIGINAL

amount of records requiring scanning. When the contract is awarded I will get with you to set up a call.

Thanks

Subject: Safety Light - record storage areas

Harry: As was discussed in the SLC OU-1 (buildings) RI/FS workplan, there are two record storage areas at the Safety Light facility in Bloomsburg that have not been evaluated by EPA. During the OU-1 workplanning, we discussed having TTNUS access those areas, evaluate them for radiological contamination, and determine if they could be safely accessed by an EPA Civil Investigator, as part of the on-going civil investigation into Safety Light and related companies.

Hans Honerlah of the USACE is involved with the Removal Action currently on-going at the Site (removal of pole building radioactive waste). He has offered to have USACE perform these activities (they need to see the records for other reasons). Hopefully, USACE (or a contractor) will be able to scan/copy these docs in the near future so the info can be distributed.

When

I receive these docs (as copies or in digital format) I will provide them to you for your use during the civil investigation.

Thanks, Mitch

Hans: How is USACE coming on this? When do you anticipate accessing the two record storage areas? Please let me know at your earliest convenience.

Thanks, Mitch
